TANKINATOR™

Unleash the Power of Clean!

Tankinator™ is a high-performance treatment created specifically for pump trucks in the portable sanitation industry. Designed to break down waste efficiently, it activates overnight into a powerful solution that keeps your truck running cleaner and smarter on every route.

Pre-measured 1-lb soluble packet makes waste management easier, more effective, and fully compliant with industry expectations.

Whether you're starting the day or wrapping a route, Tankinator™ keeps your truck ready, your process simple, and your standards high.

**We manufacture this product in full compliance with current Good Manufacturing Practice (cGMP) standards.*

Directions

Dissolve a 1-lb packet in 10 gallons of water the night before use to activate the bacteria. This solution should then be added to 500-gallons of waste.

Storage

Store in a dry, low-humidity environment.

Disposal

Transfer to a suitable container and arrange for collection by specialized disposal company. Recovery operations of the packaging are not applicable.
