

## Liquid & Portion Control Sachets

# BIO

The benefits of using Safe-T-Fresh BIO products go well beyond odor control and protecting the environment, eliminating waste build-up in tanks, hoses and pipes. The natural bacteria, when left in a tank or system, multiply over time and increase in effectiveness, breaking down solids into a liquid. Your tanks, hoses, and pipes will no longer have hardened waste that produces continual odor. And, waste treatment plants will benefit from the added natural bacteria, which helps you obtain or maintain your current dump permits.

BIO deodorizers are available in sachet and liquid form. Use the Quick Scents Bio 30-gram packets for moderate levels of traffic and heat and the Bio 60-gram for high heat and traffic. For liquids, use Safe-T-Fresh 3K in moderate conditions and Safe-T-Fresh 5K for extreme conditions.
