

Protects Equipment & Customers

# WATER TREATMENT

Ensure the cleanliness and safety of your handwash units with Safe-T-Fresh's Water Treatment Products. At Safe-T-Fresh, we understand the critical importance of providing your customers with clean, safe water for handwashing. That's why we've meticulously developed our Water Treatment Product Line – to safeguard both your customers and your equipment. Choose Safe-T-Fresh and prioritize hygiene and safety.

## KILLS BACTERIA IN WATER

### CHLORINE TABLETS

Keep your customers safe with Safe-T-Fresh Chlorine Tablets. One 1-gram tablet per 20 gallons of water will keep your handwash unit's freshwater tanks clean and bacteria free. Effective in killing bacteria like E. coli and salmonella in standing water. This do-it-yourself cleaning method is a no brainer. It will keep your customers hands safe and clean. Chlorine Tablets can be used to sanitize water and at higher doses disinfect the water tank.

## SERVICE TRUCKS (1-LB PACKET)

### TANKINATOR™

Tankinator™ is a high-performance treatment for pump trucks that breaks down waste efficiently and activates overnight to keep your routes running cleaner and smarter.

#### HOW-TO-USE

Dissolve a 1-lb packet in 10 gallons of water the night before use to activate the bacteria. This solution should then be added to 500-gallons of waste.

#### AVAILABLE SIZES

25/BUCKET

## TREATMENT PLANTS (POWDER)

### BIOBURST

BioBurst is a high-performance biological treatment for wastewater and industrial systems that activates overnight to support smoother performance and cleaner processing.

#### HOW-TO-USE

Dosage varies by system. As a guideline, use 1-3 ppm, with 2 ppm as a standard for bulk powder applications. For best results, add 1 scoop every 24-48 hours.
