

TAG 4

The Tag 4 balances the proven strengths of the original Tag sink with enhanced design and functionality to offer a more operator friendly free-standing handwash station. Using industry leading technology, the Tag 4 is more durable, easier to handle, service, and can be supplied faster, in larger quantities. With greater flexibility to hold almost any size soap and towel dispenser on the market while still fitting comfortably in most standard-size portable restrooms for ease of transportation, the next generation Tag 4 sink is a low-maintenance, essential workhorse for your fleet.

**Lift kit is optional*
