

DEMANDING, HIGH-CAPACITY ROUTES

MAL 2150

1600-GALLON WASTE / 550-GALLON FRESH

The MAL 2150 is engineered for demanding, high-capacity routes. Featuring lightweight ASTM 5454 aluminum construction and a 25,999 GVW or heavier chassis, it boasts a remarkable 1600-gallon waste capacity and 550-gallon freshwater capacity. Large dual cabinets offer ample storage, while the lowered workstation ensures an efficient, ergonomic service area, even for smaller-stature drivers. Customize a variety of vacuum and washdown systems to fit your specific application.
